Time: 8:30-11:30 or 12:30-3:30 Price: \$100.00 for the week

Registration includes snack and materials

The A-Z's of Space

March 16 - 20TH

A is for an awesome adventure for pre-schoolers. Campers will be taken through the A-Z's of space with hands-on activities created with the small ones in mind. Each camper will make their own space puppet, learn about the letters of the alphabet, and investigate the wonders of space. Materials and snack included.

Here's what our Space Camp families have to say!

"Thanks Chris, you taught me so much with the Robotics 101 class. I also had a lot of fun in CSI Moon Unit! Thank you for everything!" Daniel

"My son is 5 and this was his 1st summer camp. He had a blast!! I was relaxed & never worried how he was doing. Mr. Taylor and Miss Meghan were very good with him and we thought they were just awesome!! Ginger Reynolds

"I just wanted to say how much my son enjoyed Mission to Mars. I noticed how much all the children enjoyed it. My son didn't stop talking about it after the first day. This is the best money I have ever spent. I have recommended this camp (program) to all my friends and family. Thanks to all the staff for your hard work and consideration." Lee Ann Zacher

"I wanted to let you know that we think the summer camp program is absolutely wonderful. This is my son, Allen's, second year to come for a week. We come from Corpus and spend a week in Houston. Just so he can attend this program. The topics are great. The activities are exciting and age appropriate. My son has learned so much and he loves the projects. This is a wonderful program!" Jayne Hellums

"Thank you for a first class experience for our kids at space camp. You run a magnificent program and it's easy to see why it's so popular. Our expectations were exceeded in every area."

Capt David Maynard USN

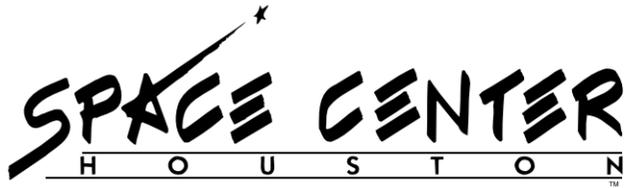

Hands-On Space Exploration Only at Space Center Houston!

Individual Day Camps (1 Day)

5-7 Year Old Camps

Time: 8:30-3:30 Price: \$55 per camp
Registration includes snack, lunch and materials

Shuttle Expedition! • March 16th

Future astronauts will explore our first reusable vehicle from nose to tail and construct a mini shuttle for experimentation. It's time to adventure through Space Center Houston's Shuttle Mock-Up while you try your luck at landing the Space Shuttle in our computerized simulators. Take a peek at NASA's new space vehicle and learn about what it will take to get us back to the moon!

May the Force Be With You (formerly Jedi Training) • March 16, 18, or 21st

Experience the world of Star Wars™ as we look at the fun science behind light sabers, the force, and all the exciting movie magic that makes Star Wars™ an out of this world experience. Young Jedi will learn how NASA takes large screen ideas and makes them outer space reality.

Yes! It is Rocket Science • March 17th

Discover how the astronauts travel to space; launch your own space vehicle and rendezvous with the space station. Experience life on the space station, from docking with the space shuttle to conducting on board scientific experiments. Take a look at the steps taken and vehicles used to get to where we are today. Take home your own spaceship.

Space Sparkles • March 17th

Jump on a comet for a trip to discover what's in the sky. Race to the Moon and learn about the stars while dining on intergalactic comets. Discover all the wonders of space while you view the night sky in our new inflatable planetarium.

3-2-1 Blastoff • March 18th

Become a Rocketeer! Blast off into NASA's world of rockets. Junior rocket scientists follow in the footsteps of Isaac Newton and Robert Goddard while they have fun building and launching a variety of rockets. Take home the rockets you construct!

Jr. Adventure Camp • March 19th

Jr. Adventurers will jump into the world of Archeology. Campers will be taken on an expedition to discover mysterious fossils on Mars. Learn the tricks of the trade to be an out of this world treasure hunter. Travel through our challenge course to see if you have the right stuff!

Space Cadet • March 19th

What's it like to live in space? Find out what astronaut food really tastes like, how the astronauts sleep on the shuttle and take a shower in space. Launch your very own space shuttle and make a mock spacesuit of your own.

Mars Mania • March 20th

Get ready to explore the red planet! Investigate robots, volcanoes, and the planet's surface. Create your own Mar's rover. Find out if there is life on Mars as you dig for fossils on a mock expedition. Make and bring home your own Martian volcano.

Whirling, Twirling Planets • March 20th

Travel through the Solar System and discover what's out there and how it moves. From our Sun to our small dwarf planet, what an adventure it will be! Discover the cosmic make-up of our planets as you experiment with solids, liquids, and gases. Create your own planet to take home.

8-11 Year Old Camps

Time: 8:30-3:30 Price: \$55 per camp
Registration includes lunch and materials

UGH! That's Gross! • March 16th

Come experience all the gross things about animals and how they relate to you. Dive into the world of slimy creatures, animal scat, and more gross things than you can imagine. Learn how these strange creatures can help us in space and on earth. Be prepared to get a little slimy because things are about to get gross! (Camp does include animal dissection demonstration)

To the Moon and Beyond • March 17th

The year is 2020 and we are going to the Moon and beyond! Join us as we explore the vehicles that will take us back to the Moon. Discover the geology of the Moon. Discover what we will encounter as we attempt to travel to the Red planet and learn all about the surface of Mars!

Beyond Earth (NEW!) • March 18th

Travel through the galaxy discovering what lies beyond planet Earth. From the planets to the stars, adventure through the Milky Way and beyond. Find out about the mysteries of space such as black holes and quasars. Campers will also take a journey through the solar system with our new planet walk.

Star Wars Adventure Camp (NEW!) • March 19th or 21st

The adventure continues; young Jedi can experience more of the science behind the movie magic of Star Wars as they explore the many galaxies and creatures that inhabit the Star Wars world. Campers will expand their knowledge of the force and design and build their own Star Wars vehicles.

Rocket "Engine-uity" • March 20th

Blast off with Sir Isaac Newton and explore his three laws of motion through rocketry activities. Investigate the aerodynamics of launch vehicles while building a rocket to launch at NASA's Johnson Space Center (weather permitting).

12-14 Year Old Camps

Time: 8:30-3:30 Price: \$55 per day
Registration includes lunch and materials

Robotics 101 • March 16th

Will robots replace astronauts in space? Come see what types of robots are being used by NASA in space exploration. Learn about Robonaut and see what is being developed by NASA engineers in the field of robotics. Build your own robotics rover and test out your rover in our NASA engineering challenge.

Failure is Not an Option • March 17th

Experience our one day astronaut training. Future astronauts will dock the shuttle with the International Space Station, learn how to land the shuttle, and try to solve some of NASA's toughest problems. Experience the Apollo 13 mission as a NASA engineer and try to solve these and other outer space problems.

Space Detectives Unit (Formerly CSI: Moon Unit) • March 18th

News Flash! Our first Moon colonists have gone missing! We need top Astronaut Investigators to explore the outpost and solve the mystery behind the missing crew. Use all your investigative skills and our tools to see if you can discover the truth.
