

## Electronics Waste Collection Event

On November 15th, 2008 there will be a large electronics waste (e-waste) collection event in the parking lot at Space Center Houston. This is part of a larger event sponsored by Sony Electronics; put on by Waste Management and Recycle America as well as CompuCycle. These companies will be participating in four simultaneous e-waste collection events happening around the Houston area. The one serving the greater Clear Lake Area and is by far, going to be the biggest of the four events.

The greatest thing about this event is that it is open to the public and it is free, free, free!!

Usually there is a fee attached to the recycling of electronics, which subsequently defers people from properly disposing of their electronics. This is an incredible opportunity to educate people about not only how to properly dispose of their electronic material, but why it is so important to recycle through an ethical recycling company; including both environmentally and protection for human rights. Many times e-waste ends up in developing nations where workers, often times children, are exposed to harsh chemicals and heavy pollution.

Our main sponsor, Sony Electronics, is an EPA recognized "e-cycle" partner, ensuring proper ethical treatment of all materials and people involved. It is truly a unique experience to be part of an event like this.

All sensitive material is physically shredded at the local Houston warehouse ensuring protection of privacy and identity. All working and non-working materials are accepted.

This event will be open to any and everyone. We appreciate your help in spreading the word on this and invite you to join us at Space Center Houston on the day of this Texas Recycles Day event.

**November 15th, 2008  
10:00 am-4:00 pm**

**Space Center Houston  
1601 NASA Pkwy  
Houston, TX 77058**

### Accepted materials include:

Computer Equipment	Memory Chips/RAM
Servers/mainframes	Point of Sale Devices
Printers/Plotters	Tape Drives
Cables/cords	Communication Equipment
Copiers	Telephone Equipment
Hard Drives	Monitors/LCDs
Power Supplies	Storage Devices
UPS	Fax Machines
Audio Visual Equipment	Peripherals
TV's	Processor Chips
Laptops	Circuit Boards
Hubs/routers/Switches	Projectors
Cellular Phones Equipment	PDA's
Consumer Electronics	Cable TV Boxes
Phone Equipment	Cameras
